TECHNICAL SKILLS

Languages:
Python, Java, C++, JavaScript, PHP, SQL
AI & ML:
Generative AI, LLMs, Machine Learning Fundamentals, Prompt Engineering, AI-Assisted Development
AI Tools:
Claude, ChatGPT, Gemini, GitHub Copilot, Cursor, Perplexity
Web:
HTML, CSS, Flask, React.js
Databases:
MySQL, MongoDB, Firebase
Core CS:
DSA, OOP, DBMS, Computer Networks, Operating Systems
Tools:
Git, GitHub, Linux,

CERTIFICATIONS

Learning Python — Infosys Springboard (Jan 2026)
JavaScript Essentials 1 — Cisco Academy (Oct 2025)
C++ Fundamentals — Infosys Springboard (Oct 2025)

LANGUAGES

English (Fluent)
Hindi (Fluent)
Marathi (Fluent)
Gujarati (Native)

PROFESSIONAL SUMMARY

Third-year B.Tech student in Electronics & Computer Science (via diploma lateral entry) with hands-on experience building full-stack web applications and SQL-backed web apps using Flask and PHP, alongside freelance experience spanning UI/UX design, project management, and software testing. Strong foundation in programming, databases, web development, and computer science fundamentals, with growing expertise in Generative AI, LLMs, and AI-assisted development. I enjoy taking projects from database design to working interfaces while continuously building practical projects alongside my coursework.

EXPERIENCE

Freelance UI/UX Designer, Project Manager & Software Tester 2026

Freelance · Multiple Clients (Direct Clients, Referrals & Local Businesses/Startups) · 3–6 months

- Worked across multiple freelance engagements handling UI/UX design, project management, and software testing for direct clients, referrals, and local businesses/startups.
- Designed UI/UX wireframes, mockups, and prototypes based on client requirements, focusing on usability and a clean user experience.
- Managed projects end-to-end as Project Manager — planning timelines, coordinating tasks, and communicating directly with clients to ensure on-time, on-scope delivery.
- Carried out software testing (functional and manual testing) to identify bugs, verify fixes, and ensure the quality and reliability of client deliverables.
- Solved complex, real-world technical problem statements independently across projects, applying strong analytical and debugging skills under client deadlines.

EDUCATION

Shah and Anchor Kutchhi Engineering College (SAKEC) 2025 – 2028

Bachelor of Technology (B.Tech) in Electronics and Computer Science (ECS)

Mumbai, India — Currently in 3rd Year (SY-ECS1)

Gramin Polytechnic College, Nanded

2022 – 2025

Diploma in Computer Engineering

Nanded, Maharashtra, India

KEY PROJECTS

Build Your Own PC

PHP · MySQL

Web Application · E-Commerce Configurator

- Developed a web application that enables users to customize and build PCs by selecting compatible hardware components.
- Implemented database connectivity to drive dynamic, compatibility-aware product selection.
- Designed a user-friendly interface for browsing and assembling parts.

Shelf

Flask · MySQL · Python

Full-Stack · Library Management System

- Built a full-stack web app to manage a library's book catalog, user accounts, and borrowing/returning transactions.
- Set up role-based access with separate Student/User and Admin dashboards.
- Built automatic overdue fine tracking and a book request & approval workflow.
- Implemented secure authentication with hashed passwords via Flask-Login.

Movie Recommendation System

SQL · DBMS

Database Design · ER Modeling

- Designed a relational database for a movie recommendation platform as part of a DBMS coursework project.
- Modeled users, movies, ratings, genres, watchlists, and cast information as a relational schema.
- Built and documented an ER diagram representing entity relationships for the recommendation workflow.
